Election Study

GLES
German Longitudinal Election Study

GLES 2017
Pre-election Cross Section

ZA6800, Version 5.0.1

Documentation of Questionnaire

The German Longitudinal Election Study (GLES) is the largest and most ambitious national election study held so far in Germany. GLES started with the 2009 federal election as a long-term project funded by the German Research Foundation (Deutsche Forschungsgemeinschaft) and was continued with the 2013 and 2017 federal elections. Since 2018, the GLES is held by GESIS as institutionalized election study in close cooperation with the German Society for Electoral Studies (Deutsche Gesellschaft für Wahlforschung).

Five principal investigators directed GLES 2017: Prof. Dr. Sigrid Roßteutscher (University of Frankfurt), Prof. Dr. Rüdiger Schmitt-Beck (University of Mannheim), Prof. Dr. Harald Schoen (University of Mannheim), Prof. Dr. Bernhard Weßels (Social Science Research Center Berlin), and Prof. Dr. Christof Wolf (GESIS – Leibniz Institute for the Social Sciences), in close cooperation with the German Society for Electoral Studies (Deutsche Gesellschaft für Wahlforschung).

The following documentation refers to the Pre-election Cross Section of the GLES 2017 and will give you some general information about the dataset.

<u>Bibliographic description of the dataset</u>

Study No.	ZA6800
Title	Pre-election Cross Section (GLES 2017)
Current Version	5.0.1, 02/26/2019
doi	10.4232/1.13234
Citation	Roßteutscher, Sigrid; Schoen, Harald, Schmitt-Beck, Rüdiger; Weßels, Bernhard; Wolf, Christof; Bieber, Ina; Stövsand, Lars-Christopher; Dietz, Melanie; Scherer, Philipp (2019): Pre-election Cross Section (GLES 2017). GESIS Data Archive, Cologne: ZA6800 Data file Version 5.0.1, doi:10.4232/1.13234

<u>Basic information</u>

Funding Agency	German Research Foundation (Deutsche Forschungsgemeinschaft)
Data Collector	Kantar Public Germany
Date of Collection	07/31/2017 – 09/23/2017
Content	The first component of GLES composes a pre- and a post-election cross-section survey. In the pre-election cross section, a total of 2,179 interviews were realized.

<u>Methodology</u>

Geographic Coverage	Germany (DE)
Universe	The population comprises all people with German citizenship resident in the Federal Republic of Germany, who had a minimum age of 16 years and lived in private households at the time the survey was being conducted.
Selection Method	Random sampling on the basis of local population registers. Oversampling of population in East Germany.
Mode of Data Collection	Computer Assisted Personal Interview (CAPI), with an average duration of approximately 64 minutes.
Field Work	All in all, 162 sampling points were drawn. The interviewers were paid an attractive and motivating salary. In general, they were compensated based on the number of completed interviews and their expenses. Furthermore, an additional bonus was paid if the interviewers recruit respondents successfully for the GLES panel.
Response Rate	6.2 percent of 7,776 addresses were losses not specific to the sample. Based on the adjusted 7,284 gross addresses, 2,179 interviews were realized successfully. Thus, the response rate is 29.9 percent.

Weights   The pre-election cross section comprises two types of weights: design and post-stratification weights.

The "East-West weighting" (w_ow) includes a special weight factor for the regions of Germany (East, including Berlin, and West). This design weight corrects for the disproportional sample size of these regions.

The "Sociodemographic and regional weights with (and without) transformation weight" create the second type of weights (post-stratification) provided in the dataset. Those weights were calculated by using the iterative proportional fitting (IPF). The iteration process ends when the difference between the weighted marginal distribution and the aimed distribution becomes smaller than 0.0001. To prevent large factors, the weights were trimmed (after each iteration) so that no weight is more than 5 times larger than the average weight. The weights were constructed on the basis of gender, age (4 groups: 16 to 29, 30 to 44, 45 to 59 and 60 years and older), education (three groups: low, middle, high), BIK-regions (three groups) and East-West (for the weighting, all respondents living in Berlin received the East German weighting factor). Missing cases were replaced with the mode. The dataset includes six sociodemographic and regional weights: one weight for Germany as a whole as well as East and West Germany individually. For each of these regions, two weights were included: one with the transformation weight and one without it.

Data access

Usage regulations   Data and documents are released for academic research and teaching: access category A

Anonymized data   According to German privacy, only anonymized data can be made accessible for public download. Thus, some variables had to be deleted from the publicly available dataset or answers were summarized in larger categories.

As a matter of course, no information is lost: All variables can be used by interested researchers in a Secure Data Center (SDC) at GESIS (Cologne, Mannheim). Some variables are also available by signing a user contract. If you are interested in those variables, please send an e-mail to gles@gesis.org. An overview of those variables can be found on our homepage (www.gesis.org/gles).

Errata

The variables q41i, q43i, q45i, q46i, q48i, q49i, q50i and q51i (Party contacts: "other parties") are missing in the dataset.

Contrary to specifications in the questionnaire, several respondents received code -97 "Not applicable" in variables v77b-f "Familiarity with constituency candidates". This concerns 55 respondents for SPD, DIE LINKE, and FDP, as well as 60 respondents for GRÜNE and 140 respondents for AfD. For 55 respondents, this is probably due to a coding error, as they received code -99 "not stated" in v77a "Familiarity with constituency candidates of CDU/CSU". For the remaining respondents who received -97 "Not applicable" for familiarity with constituency candidates of GRÜNE and AfD, probably no candidates of the respective parties stood for election in their constituencies.

Changes between Version 1.0.0 and Version 2.0.0
- Control of interviewers resulted into the deletion of two observations.
- ISCO-88 and ISCO-08 variables have been added.
- Open answers of the most and the second most important problem are added in a csv-file.
- Correction of variable and value labels.

Changes between Version 2.0.0 and Version 3.0.0
- The respondent´s ID has been replaced by the variable lfdn "Laufende Nummer".

- The variable q190z has been removed from the dataset.

Changes between Version 3.0.0 and Version 4.0.0

- Codings of the open answers to the variables "Most important problem" and "Second most important problem" (q22_c1 - q22_c5, q23_c1 - q23_c5) have been added to the data set.
- The open answers to the variables "Most important problem" and "Second most important problem" (q22s, q23s) have been deleted.
- The serial number has been corrected.
- The weighting variables have been updated, now using the marginal distributions of the German micro census 2016 (previously micro census 2013).
- The variable Virtual Sample Points (vpoint) has been added to the dataset.
- The variable bik10 has been removed due to data protection.

Changes between Version 4.0.0 and Version 5.0.0

- The weighting variables have been updated, now using the marginal distributions of the German micro census 2017 (previously micro census 2016).
- Timestamps are provided in a separate data set.

Changes between Version 5.0.0 and Version 5.0.1

- Publication of an English version of the datasets and questionnaire.

The most recent errata list is provided by the GESIS Data Catalogue (www.gesis.org/dbk). There you can also find a list of all changes made between the different versions of the dataset.

<u>Further remarks</u>

The data of this study is also available as cumulation (ZA6802) with the post-election cross section (ZA6801).

Two further pre-election cross sections have been conducted in a similar way within the GLES 2009 (ZA5300), and GLES 2013 (ZA5700).

You can find more information about GLES at www.gesis.org/gles and http://www.gles.eu.

To get an overview of the use of our data, we kindly request users of GLES-data to inform us about publications that utilize those data (biographic description, study no. of the dataset). Publications using GLES-data are listed in the official bibliography of the GLES project. In case of limited access to your publication (e.g. conference papers), we would highly appreciate if you could send us an electronic (PDF file, gles@gesis.org) or a print copy of your publication.

E-mail: gles@gesis.org

Please note:
As a public service to the international academic community, we provide English translations of GLES datasets, questionnaires, and related important documents. Due to specifics of the original documents in German and the fact that translations were not done by political scientists, the wording of established social and political science questions and constructs in these translations may occasionally deviate somewhat from the Standard English versions. If you have any questions concerning the translations, do not hesitate to contact the principal investigators or their collaborators. For an overview of the whole research team, please have a look at the GLES website http://gles.eu. You can also send an e-mail to gles@gesis.org.

Sequence	Question number	Variable name	Question title
1,000	Int01	q1	Gender
2,000	D01.1	q2a-c	Month and year of birth
3,000	Vw087	q3	Interest in politics

Filtered by question number:
Vw121 = 1-801
(only respondents who lean toward a particular party)

Interviewer instruction:
[display list; read out values]

Programming:

Question text:
As part of our study we would like to find out what people mean when they say that they lean toward a particular political party or identify more closely with one party rather than with other parties. Please tell me which of these statements best applies to you.

Item:

Scale:

(1) 1 - This party is very important to me. What happens to this party is not a matter of indifference to me.
(2) 2 - The party itself is not all that important to me, but it does have better politicians than the others at the moment.
(3) 3 - I don't feel particularly attached to this party, but in the past I did vote for it frequently.
(4) 4 - The party itself is not all that important to me, but it does have better policies than the others at the moment.

Filtered by question number:

Interviewer instruction:
[if there is a request:
The follow-up surveys will probably be conducted 1-2 times a year.
There will be a small present every time
The follow-up surveys will be conducted by GESIS.
The follow-up surveys will of course be anonymous / will comply with data privacy.]

Programming:

Question text:
Thank you for taking part in the survey.

The federal election is now over, but the Deutsche Wahlstudie goes on.
Your opinion will continue to be important to us in the future!

It is very interesting for us to study how attitudes to political issues develope between general elections.

We would therefore like to invite you to take part in a small continuation of the Deutsche Wahlstudie next year. These short surveys take around 15 minutes.
You can either participate by computer or we will send you a questionnaire by post which you can then send back to us at no cost.

Whatever you would like - we look forward to your participation.
Of course, participation is always voluntary and the agreement you give today does not commit you to participating in the future.

May we invite you?

Item:

Scale:
(1) Yes
(2) No

- -

(-99) No answer

Catalogue number:	**Question number:**	**Sequence:** ,000
Variable name: q194	**Question title:** Willingness to participate in panel: e-mail address	

Filtered by question number:

Interviewer instruction:
[If there are several e-mail addresses, make a note of the address at which the surveyed person wishes to receive invitations.
Please write dots, underscores, hypens, etc. correctly.
Show the e-mail address you have entered to the person again to make sure it is correct.

Use the coding instructions for entering the e-mail provider (hostname) and domain name. If the e-mail provider or domain name is not included in the available codes, please enter it yourself.]

Programming:

Question text:
You are sure to have noticed that the Internet is becoming more and more important.

This is why we would like to invite you to take part in the next Deutsche Wahlstudie survey by e-mail, which you can then complete online at your own convenience.

Please tell me your e-mail address for this purpose.

Item:

Scale:
<enter e-mail address>

- -

(-98) Does not wish to provide e-mail address
(-99) No answer

Note:
This variable is not included in the datasets as it cannot be published for data protection reasons.

Catalogue number:	Question number: Int09	Sequence: 195,000
Variable name: q195	Question title: Willingness to participate in panel: place of brith	

Filtered by question number:
Int07 = 1
(only respondents who are willing to participate in panel)

Interviewer instruction:
Identification is required as some people share an e-mail address.
For our research it is important that we always talk to the same person.

Programming:

Question text:
I would now like to ask you to tell me the first letter of your place of birth.

Using your year of birth, month of birth and the first letter of your place of birth we will create a type of password for you which we will ask for the next time we send a survey by post or by e-mail.

Item:

Scale:
<Enter letters>
